# VESTRACKER

Convenience in Freight Forwarding, Work Smart, Deliver Fast !

About Vestracker

Vestracker is an online service which allows freight forwarders and Logistics companies to manage all their internal agency operations in one place. We provide a SAAS solution, that encompasses the latest freight management software for optimal functionality, covering the full freight forwarding lifecycle. The easy to use forwarding system consists of several modules, designed to remove inefficiencies. Saving you time and money.

We aggregate data from multiple shipping-lines, airlines and trucking services in real time; providing users with a one stop platform for all supply chain activities. Vestracker's visibility feature, allows freight forwarders to improve service delivery to their clients, through scheduled updates and notifications. Finally, we facilitate collaboration between all stakeholders, provide real time messaging, file sharing, document storage, invoicing, analytics and KPI reporting to partners and clients across the globe.

All Vestracker's solution are built using state of the art technologies for utmost customer convenience, scalability, security and functionality. The cloud solutions are therefore highly advanced yet easy to use, allowing customers to maximise operational efficiency and productivity in the global market. This is an opportunity for small to and multinational freight forwarders to obtain the IT capabilities needed to move business forward around the globe.
